Tian Peng

Mail: pt0796@163.com
Tele：18682381725 Date of Birth：1992.02

Education

Oct.2017-May.2021	**Ph. D.** in Civil Engineering, **Universitat Politècnica de Catalunya**, Barcelona, Spain Stipend from the European Social Fund **Excellent Cum Laude，International Doctoral Honors** Supervisor: Prof. José TURMO
Jan.2020-Jul.2020	Visiting Scholar, **Delft University of Technology**, Delft, Netherlands Supervisor: Prof. Maria Nogal
Sept.2014-Jan.2017	**M.S.** in Structural Engineering, **Tongji University**, Shanghai, China Supervisor: Prof. XIE Qiang GPA: 85.7/100 Honors and Awards: "JINHAI" special Scholarship, Tongji University,2015 (Awarded in top 2%) Admission Scholarship of Tongji University, 2014
Sept.2010-Jun.2014	**B.S.** in Civil Engineering, **Shanghai University**, Shanghai, China GPA: 87.75/100 Rank:10nd out of 310 students Honors and Awards: Excellent Graduates of Shanghai University, 2014. (Only one among 100 students) Excellent students of Shanghai University, 2012. (Awarded in top 2%) First-class Scholarship of Shanghai University, 2011, 2012. (Awarded in top 2%) " The 15th Summer Practice" Advanced Individuals of Shanghai University, 2013.

Work Experience

Aug.2021-	THE SECOND COMPANY OF CHINA CONSTRUCTION SECOND ENGRG BUREAU LTD. (**CSCEC**), Shenzhen, China. Responsible for research and development projects, as well as corporate carbon inventory

Competitiveness

Lerobot	Be familiar with using **Lerobot for teleoperation, training, and reasoning** A system for crack detection and autonomous sensor deployment in masonry structures, based on YOLO visual coarse localization and LeRobot imitation learning for precise operation.

Publications

1. **Peng, T**., Nogal, M., Casas, J., Lozano-Galant, J. and Turmo, J*., 2020. .Constrained observability techniques for structural system identification using modal analysis *Journal of Sound and Vibration*, 479, p.115368. SCI， Q1，IF：3.655.
2. **Peng, T**., Nogal, M.*, Casas, J. and Turmo, J., 2021. Planning low-error SHM strategy by constrained observability method. *Automation in Construction*, 127, p.103707. SCI， Q1，IF：7.7.
3. **Peng, T**., Nogal, M., Casas, J. and Turmo, J., 2021. Role of sensors in error propagation with the dynamic constrained Observability method. *Sensors*, 21(9), p.2918. SCI，Q1，IF：3.576.

Academic Experience

1 Research on “**Assisted decision-making system for infrastructure life cycle** (246,840 Euros)”.Belongs to **Spanish Ministry of Economy and Competitiveness Project.**
Study a new method to do the structure health monitoring, focus on the error influence of frequencies and mode-shapes. Oct.2017–Jul.2019, ***Participate***.

2 Research on “**Online monitoring of Aeolian vibration of transmission line and research of its anti-vibration(**80,000Rmb**)**". Belongs to **Guangdong Electric Power Research Institute.**
Study the performance of stock-bridge damper in different situations , the coupling of conductor and stock-bridge damper, and Optimization design of stock-bridge damper. Sept.2015–Dec.2016, ***Project Leader***.

3 Research on “**Research on key technologies and applications of using natural energy to reduce temporary building energy consumption in prefabricated construction(**20,000Rmb**)**”. Belongs to **China State Construction Engineering Corporation**.
Sept.2022-May. 2025, ***Project Leader***.
